BETTER DECISIONS FOR BIODIVERSITY AND PEOPLE

PLANET4B

Synergies Strategy Description

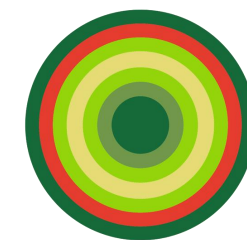

- The synergies strategy includes steps on how to approach and cooperate with different synergistic projects and initiatives
- Maps international and national initiatives and projects on behavioral science, intersectionality, gender, climate change and biodiversity
- Collaboration between projects and initiatives will seek to produce results that are greater than what projects could achieve on their own, with the aim to maximise reach, impact and potential uptake in prioritisation of biodiversity in decision making.

PLANET4B

Collaboration with external projects and initiatives will seek to leverage synergies around different *types* of cooperation

- Knowledge sharing
- Knowledge co-production
- Common dissemination and communication
- Actions leading to future collaboration

Steps for identifying synergies and coordinating collaboration

PLANET4B

Next steps

Goal of reaching out to 60 projects and initiatives by M12 of the project (20 have already been reached out to)

Stocktake of the impact of collaborative activities in M12

Contact to establish collaborative relationships with relevant projects and initiatives will continue to M30.

D5.5 has helped inform the creation of D5.11 (M9)

Action Plan of Transformative Change Clustering

Deliverable number: D5.11

How does the synergies strategy help/affect you?

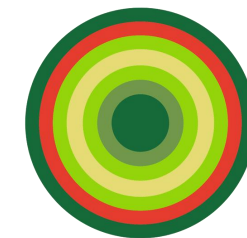

PLANET4B

Seeks to work as a framework should you wish to explore collaborating with external partners within the context of your PLANET4B work to increase impact / reach / uptake

Provides a repertoire of ongoing projects and initiatives for you to consider

You may be contacted by someone at UNEP-WCMC should collaborations be established on synergies relevant to your work

How does the synergies strategy help/affect you?
