DEAR READER,

Welcome to the latest [PLANET4B](#) newsletter!

Get to know the news of the project and the latest updates from our partners.

Join us in this learning process!

Best regards,
PLANET4B Team

Seeds of Transformation: Why Local Action is More Essential Than Ever to Show The Way For International Agreement

"If we do not even address the elephant in the room, how can we expect an even remotely adequate response, while the global crises continue to accelerate impacting the most vulnerable groups first?"

Empowering Communities for Biodiversity: Exploring System Mapping and Leverage Points for Transformative Change

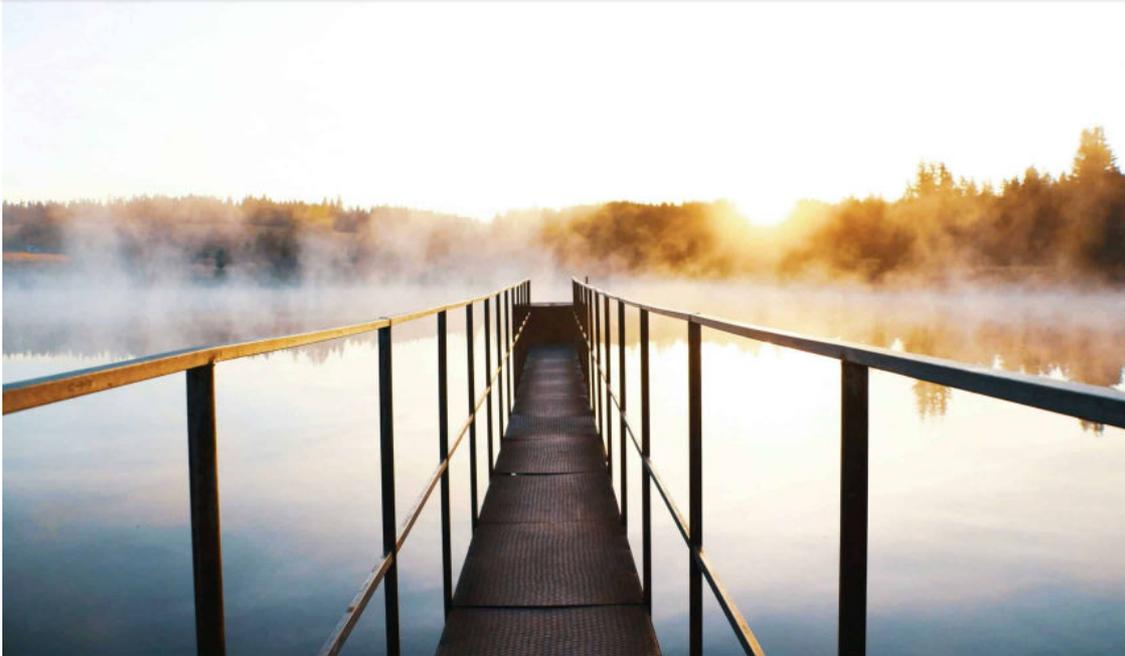

Who needs to be convinced that children with disabilities should have opportunities to connect with nature and experience its closeness? Can a local chef, a religious leader, or a school principal play a key role in preserving biodiversity? Can Amazonian Indigenous communities influence the ecological footprint of Europeans? What could replace fast fashion if we want to protect the planet?

The **“Report on the system mapping and leverage points for each case”** presents the system mapping process, identification of leverage points and its specific outcomes as applied to the case studies.

Bridging Disciplines – The PLANET4B Blueprint for Transformative Biodiversity Research

The analysis "**Transdisciplinary diagnostic framework for biodiversity decision-making assessment**" of the PLANET4B project summarises the results of nearly one and a half years of intensive methodological research.

This comprehensive study proposes a methodological framework that helps examine decision-making and influencing decisions about biodiversity by involving numerous scientific disciplines.

Innovative experiment in the garden for women

A very special small community garden has joined the PLANET4B project. At GAIA Gartenberg, only women farm, and alongside the plants, a strong female community is also flourishing. This unique ecosystem provides an opportunity for the PLANET4B research to gain deeper insights into urban gardening, biodiversity, and the interactions between different social groups as part of the “City food for biodiversity and inclusion” case study.

“Breaking Barriers, Building Opportunities for Biodiversity Prioritisation in Decision-making” –

What is the Food Governance Game? Why is it so exciting? Who is it recommended for?

Can an outdoor cinema night with a community change our mindset? What should we keep in mind if we plan to organize an event like this?

You can find answers to all these questions in our partner CGE Erfurt's latest blog post, where they evaluate methods and interventions examined within the framework of the PLANET4B project in collaboration with the local learning community.

Entry points for change

Sharing lessons learnt and identifying entry points to upscale findings is a crucial part of PLANET4B, and project partner UNEP-WCMC has been engaging with policymakers and businesses to fulfil this goal.

Is the EUDR working for people and planet? PLANET4B project looks at Dutch-Brazilian beef and soy trade through the lens of intersectional environmental justice in one of its case studies. Via 20 interviews on both sides of the supply chain, PLANET4B considers the underlying drivers of environmental injustice, for humans and non-humans.

Intensive agricultural trade is often associated with environmental injustice, affecting marginalised communities while depleting forests, rivers and biodiversity, so the 2023 Regulation on Deforestation Free Products (EUDR) was a welcome step.
