learning resources, educational materials, engagement methods, guidelines, biodiversity

Care-Full Courses & Resources - Build Skills. Shape Change. Support Biodiversity.

Are you a teacher looking for off-the-peg biodiversity lessons and activities for your students?

Or a policymaker seeking to engage harder-to-reach communities around issues of biodiversity and inclusion?

Or perhaps you are a sustainability ambassador at work, longing to interweave biodiversity into your business and the mindsets of your colleagues.

Or do you represent an NGO? You know all about biodiversity, but need some methods to engage your audience?

Or are you a researcher keen to explore more creative ways to collect data?

Care-full Courses and Resources is a completely free website offering a wealth of **learning resources** tailored to specific target groups. Choose to navigate through an introduction to biodiversity, or delve straight into the engagement method catalogue. Explore our Spotlights of **creative, well-tested methods for transforming mindsets**. Learn how to set up Learning Communities – spaces for deeper engagement and higher potential for transformation. Browse the engagement method catalogue, whether you have five hours, or five minutes, we are confident you will find an innovative icebreaker or a more complex method that can promote systematic change. Discover our **clear guidelines** for businesses, NGOs and policymakers looking to engage their employees or audiences in pro-biodiversity, inclusive thinking, decision-making and action.

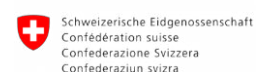

Our thoroughly developed, credible, evidence-based **educational materials** for school teachers and those in extra-curricular settings have just won one of the EC's [Education for Climate 2025 Green Education Projects: Citizenship Education awards](#). The toolkit will equip secondary, higher and primary educators with the knowledge and skills to engage their students in experiential activities and inspire them to act for biodiversity beyond the classroom.

PLANET4B receives funding from the European Union's Horizon Europe research and innovation programme under grant agreement No 101082212.

This project is funded by UK Research and Innovation (UKRI) under the UK government's Horizon Europe funding guarantee.

This project receives funding from the Swiss State Secretariat for Education, Research and Innovation (SERI).

Developed within the PLANET4B project by experts from Coventry University, TEHRA, and other researchers and practitioners from different fields, this brand-new platform offers **accessible, well-structured and visually inspiring resources**. Here, everyone can find relevant information, educational toolkits and background knowledge in a form that is both **easy to understand and enjoyable to explore**. With these materials, learning and gaining new insights becomes not only useful, but also engaging and fun.

Why Care-Full Courses & Resources?

The learning resources help users build skills in facilitation, storytelling, and inclusive decision-making.

The online course offers a free, flexible learning resource that equips professionals and communities with creative, socially grounded methods for engaging with biodiversity.

Visit the [website](#), browse through the resources most relevant to you, and share the knowledge provided by the PLANET4B project.

About PLANET4B Project

Horizon Europe research project PLANET4B aims to understand and influence decision making affecting biodiversity and to map existing knowledge that explains why certain decisions are made, to understand better how biodiversity can be prioritised in our decision-making.
